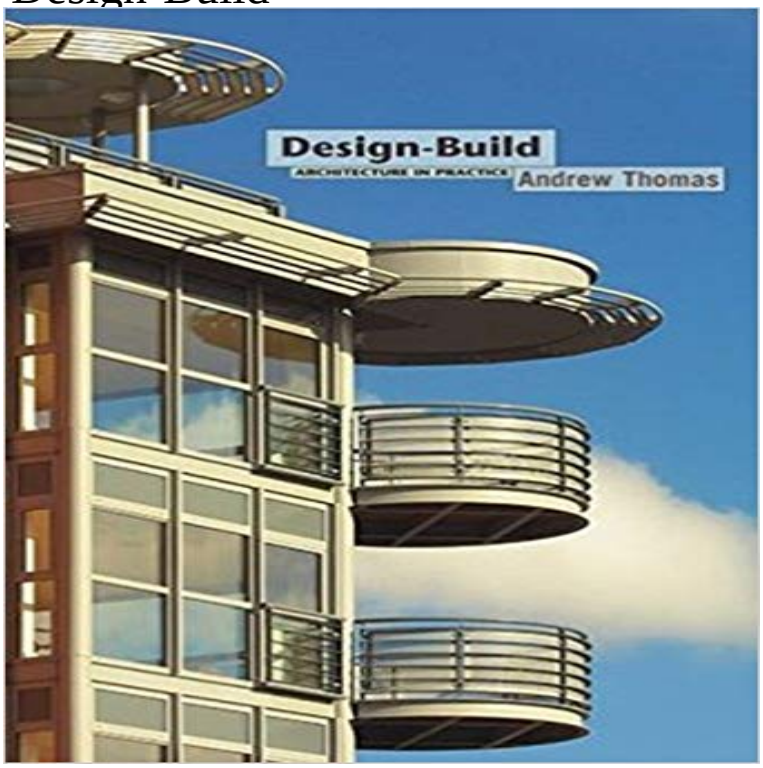
Design-Build



Examine the standard procedures making up the life cycle of a design and build project in the latest publication in the Architecture in Practice Series. Author Andrew Mark Thomas provides commentary on the procurement route, specifics of design and build, and the documents which make up this environment. He then describes the process of tendering, how the contractor runs the project, the specific JCT conditions of contract, the consultants? roles, and a who?s who of those involved in the project. Interspersed among this information are illustrated case studies demonstrating how Design and Build works in various countries.

Sustainable Renovations and Construction Since 1992.Designbuild is a project delivery system used in the construction industry. It is a method to deliver a project in which the design and construction services aredesign-build agreement ??????? - ??This study focuses on completed design-build projects under SEP-14.
