

We are All Waterbabies

An examination of the role of water in pregnancy, labour and the neonatal period, which covers water-based exercise during pregnancy, water birth and swimming for babies.

All new Water Babies starting out on Chapter 1 will be given a complimentary place on an underwater photo shoot. When you start your splashy Water Babies They're all Water Babies teachers who've been specially trained to watch and interpret your baby's body language, expressions - and even the noises they make. Water Babies began in Ireland in 2009 when two sisters brought the magic of baby swimming to the world. We're a laid-back yet very determined bunch who all love babies, love our teachers are the highest-trained baby swimming teachers in the world: ours are the best. We're committed to the Baby and Toddler Swimming Teaching Safety. We think every Water Baby is special. Emma, from Staffordshire, knows all about the benefits of baby-swimming for the physical and mental development of your baby. We work with one main involuntary response: the laryngeal reflex (more commonly known as the gag reflex). This enables your baby or toddler to avoid inhaling water. We are All Waterbabies [Michel Odent, Jessica Johnson] on Amazon. *FREE* shipping on qualifying offers. An examination of the role of water in pregnancy, labour and the neonatal period, which covers water-based exercise during pregnancy, water birth and swimming for babies. Water Babies has some very strong core values which, we have found, are also shared by many other organisations. We all know about rising levels of child obesity and diabetes in the UK. We've been swimming with Water Babies since Oran was 6 months old. He loves the classes and has developed into a happy and confident toddler in the water. Here at Water Babies, we work really hard to be inclusive: over the years, we've taught lots of children and parents and carers, too with all sorts of special needs. All of this is a great source of pride for you and them (and us!), and offers fantastic safety skills should they ever fall into water. However, children lack the
